PROFESSIONAL EXPERIENCE

CSI Cornerstone Sdn Bhd | **Software Developer** | *March 2025 – March 2026*

Managed a portfolio of enterprise client accounts (KWSP, CIMB, BURSA, PNB), acting as Technical Lead across the full SDLC — from analysis and design through development, deployment, and post-go-live support.

- Consulted clients on system integration and policy changes, translating business requirements into actionable technical specs.
- Led project delivery end-to-end, ensuring deliverables and SLAs were consistently met.
- Maintained strong client relationships, serving as the main technical point of contact for escalations and enhancements.
- Wrote Python scripts using Pandas to parse log files and query database records for customer troubleshooting and root cause analysis.

Key Projects:

- Bursa Paymate Tech Refresh v9 → v10 (2025) — led setup, UAT, production rollout, and post-prod stabilisation.
- KWSP Paymate Tech Refresh v9 → v10 (2025) — same end-to-end ownership across all deployment phases.

Process & Documentation:

- Organised case logs, incident reports, DR flows, and customer request records; prepared client-facing PowerPoint decks and project reports.
 - Designed company development workflows and set up Git-based pipelines — staging, branching, and automated builds, eliminating manual packaging.
-

Evangeline Verto Sdn Bhd | **Full Stack Developer** | *September 2024 – January 2025*

- Built scalable Next.js e-commerce platform — product listings, cart, and checkout flows; integrated Redux and Zod for state management and validation.
 - Designed GraphQL APIs handling order management, inventory queries, and user authentication across MySQL and MongoDB.
-

Ocean Blue Solution | **Chrome Extension Developer** | *August 2023 – June 2024*

- WhatsApp CRM Chrome Extension — lets users store and manage customer contacts from WhatsApp Web, with automated messaging and AI smart replies generated from chat history.
 - Ran competitor research and market analysis; generated leads via content across Facebook, YouTube, and blog.
-

Wemabox Solutions Sdn Bhd | **Techno Function Engineer** | *August 2022 – February 2023*

- Self-hosted WhatsApp Gateway — built a full messaging platform with management dashboard, NLP chatbot for automated replies, and bulk messaging to contact groups.
 - Drafted and proposed features based on stakeholder requirements; built and maintained protocol-level components.
-

Ocean Blue Solution | **Software Developer** | *January – July 2022*

- Telegram Automation Tool — built a desktop app to send messages and invite users to groups/channels at scale, with configurable scheduling and account management.
-
